

PoD Mobile Android App Installation

PoD Mobile app installation consists of two parts. First we need to make sure that your Android device allows installation from “Unknown Sources” because PoD Mobile isn’t being installed from the Google Play Store. Second part is the actual app installation.

Enabling “Unknown Sources”

For devices with **Android 2.3 (Gingerbread)**

1. Go to All Apps menu and open Settings
2. Under Settings open Applications
3. In the Application Settings menu find “Unknown sources” checkbox.
4. If the checkbox is already checked, then leave it, you are good to go. Otherwise check the checkbox, you will be presented with a warning message which you will dismiss by selecting OK. Now the checkbox should be checked and you can return to the home screen.

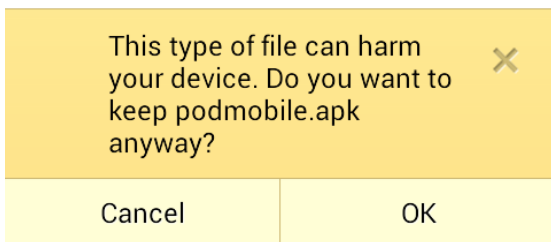

For devices with **Android 4.0 (Ice Cream Sandwich) and up**

1. Go to All Apps menu and open Settings
2. Under Settings open Security (section Personal)
3. In the Security Settings menu find “Unknown sources” checkbox.
4. If the checkbox is already checked, then leave it, you are good to go. Otherwise check the checkbox, you will be presented with a warning message which you will dismiss by selecting OK. Now the checkbox should be checked and you can return to the home screen.

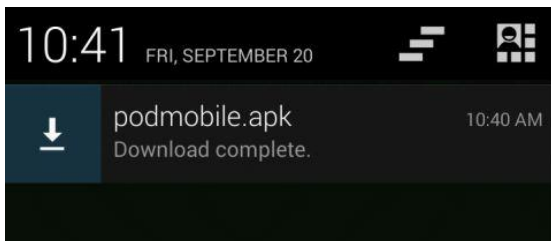

Note: These are the typical locations of the “Unknown sources” checkbox but the location may vary on some devices.

Downloading and Installing PoD Mobile

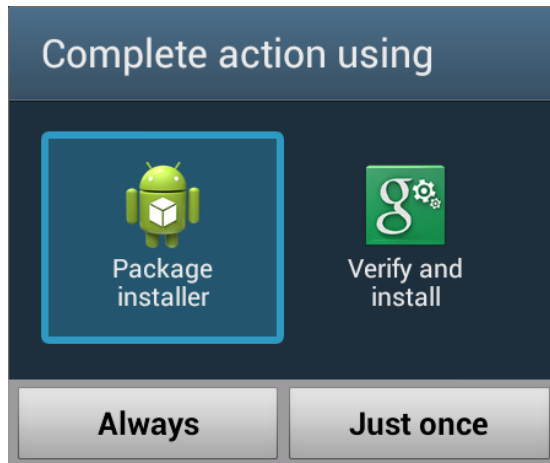

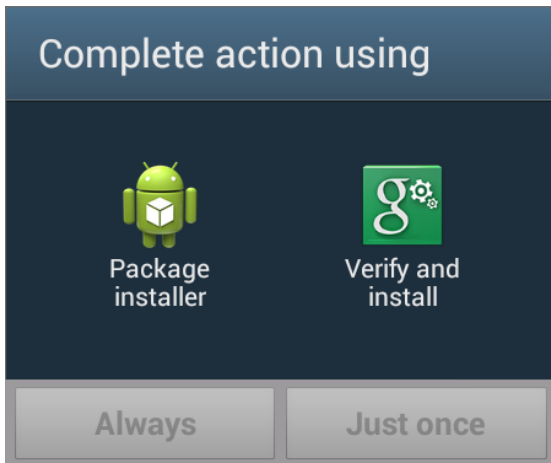

1. Open your mobile internet browser
2. Navigate to url <http://build.nexusinnovations.com/Android/podmobile.apk> to download the PoD Mobile app. You may receive a warning similar to the one below. Click “OK” saying that you want keep the app anyway.

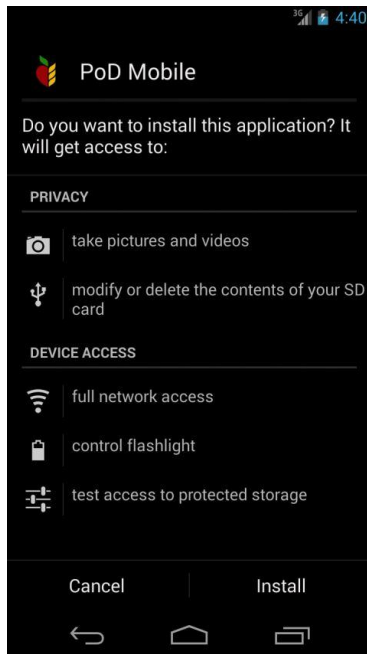

3. After the file is downloaded pull down your notifications bar to open the notifications area where you will find podmobile.apk download complete notification. Tap on that notification which will launch the installation.

You may be presented with a dialog similar to the one below, asking you what you want to use to complete this action. Select “Package installer” and tap the “Just once” button.

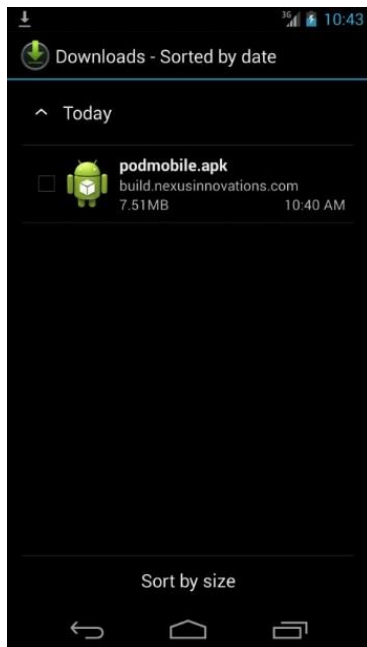

Select “Install” on the installation confirmation.

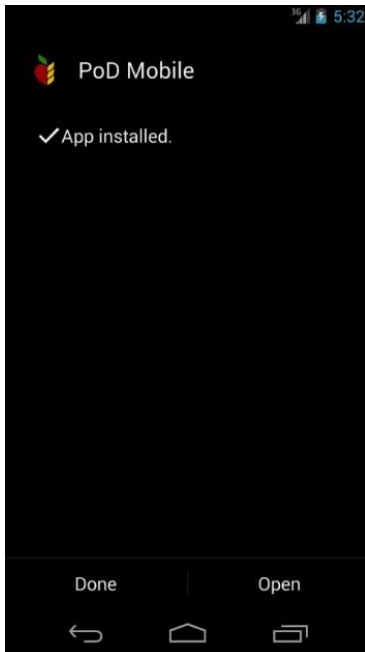

Note: If the notification disappears the file can be found in the Downloads folder. For that go to

the all apps menu and tap on the “Downloads” icon

4. After the app is finished installing you will be presented with a screen similar to the one below. There you can select whether you want to open the app right the way or just be done. Either way, the installation is complete and you can find the PoD Mobile app in your All Apps menu among your other apps.

Note: Your screens might slightly vary from the screenshots above depending on your device's Android version and the manufacture.
